[Link title]

Here's a sentence with a footnote. [^1] Here's another footnote. [^2] And another footnote. [^3] And some `code` embedded in text.

[^1]: This is the first footnote. [^2]: This is the second footnote. [^3]: This is the third footnote.

To create a line break, end a line with two+ space and hit return.
Note that you need to escape the following characters \:

Fenced code block\:

```
{
  fenced code block
  fenced code block
}
```

When finished writing in markdown, convert .md to .html using bash\:

```
sudo apt-get update
sudo apt-get install pandoc
```

Then from terminal\:

```
pandoc -f markdown file.md > file.html
```

Convert .md to .pdf from Atom\: `Packages > Markdown to PDF > Convert`

You can also convert .md to .pdf using bash\:

```
pip install grip
grip file.md
```

Then use Chrome's "Save as PDF" in the Print dialog.
